Arashi Journal of Metals and Material Sciences is a recently launched open-access journal which specifically focuses on metals and materials, dedicated to serve the scientific research fraternity.

We are delighted to announce that the submission of scientific articles is now open.

Focus of the journal

Metals and material sciences are the two major areas of focus, encompassing several subfields of research:

Metals

Alloys: Design and optimization of new alloy compositions.

Biometals: Biocompatible and biodegradable metals for medical applications.

Metal matrix composites: Fabrication, properties, and applications of composites with metal matrices.

Metallurgy and tribology: Physico-chemical and tribological properties of metals, compounds, and composites.

Material sciences

Materials for structural applications: Materials for construction, automotive, aerospace, etc.

Materials for energy harvesting and storage applications: Materials for batteries, supercapacitors, nanogenerators, hydrogen production and storage, renewable and non-renewable energy systems, etc.

Materials for biomedical applications: Materials for diagnosis, treatment, tissue regeneration, medical devices, etc.

Functional materials: Materials with superior properties and specific functionality.

Materials for coatings and interfaces: Materials for surface engineering and coatings.

Design and simulation: Computational tools and simulations for designing materials.

Collaborate with us

A commitment to editorial integrity is the foundation of our journal. Our team of expert editors strictly examines every submitted manuscript. In addition to the care taken during the editorial process, our double-blind peer review model ensures the relevance, accuracy and integrity of the content published.

Types of Publications

- Original Research articles
- Short communications
- Extended Review articles
- Mini Review articles
- Perspectives

We invite scholars, scientists, and researchers from all over the world to submit their scientific articles for possible publication in Arashi Journal of Metals and Material Sciences.

We welcome you to choose Arashi Scientific Publishers as your publishing destination. Let us broaden our research field, speed up the pace of advancement, and create a better tomorrow.
